## Education

### Sinhgad Academy of Engineering, Pune

*Bachelor of Engineering, Computer Engineering*

**Expected Jun 2027**

*CGPA: 9.34/10*

### Government Polytechnic, Pune

*Diploma, Computer Engineering*

**Jun 2024**

*Percentage: 87.77%*

### Podar International School, Wagholi

*Class 10, CBSE*

**Jun 2021**

*Percentage: 95.8%*

## Work Experience

### Wishlistz

**Dec 2025 – Mar 2026**

*MERN Stack Intern*

*Remote*

- Developed backend services for an AI-powered chatbot using Node.js and Express.js to handle real-time user interactions
- Designed and implemented RESTful APIs to efficiently process user queries and chatbot responses
- Integrated MongoDB for structured storage and fast retrieval of conversational data
- Implemented intent handling logic to enhance chatbot response accuracy and improve user experience

### MotionCut

**Jan 2025**

*Frontend Web Development Intern*

*Pune, India*

- Built responsive and user-friendly web interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility
- Optimized website performance by reducing load time and improving rendering efficiency
- Translated UI/UX design wireframes into functional web pages with pixel-perfect accuracy
- Collaborated with team members to enhance usability and maintain consistent design standards

### DK Robotics

**Jun 2023 – Jul 2023**

*Web Developer Intern*

*Pune, India*

- Designed and developed a fully responsive corporate website using HTML, CSS, and JavaScript
- Improved website performance through optimization techniques such as asset compression and efficient styling
- Deployed the website for public access and ensured smooth functionality across different browsers

## Projects

### Qumail | Live | GitHub

**MERN Stack Email System**

- Engineered a full-stack email platform using the MERN stack (React.js, Node.js, Express.js, MongoDB) supporting user authentication and email management
- Implemented secure authentication and authorization using JSON Web Tokens (JWT), ensuring protected user sessions
- Designed RESTful APIs for core functionalities including sending, receiving, and organizing emails
- Developed dynamic and responsive UI using React.js for seamless user interaction
- Integrated database operations using MongoDB for efficient email storage and retrieval
- Deployed frontend and backend using Vercel and Render, ensuring high availability and accessibility
- Followed modular and scalable architecture to support future feature enhancements

### DK Robotics Corporate Website | Live | GitHub

**HTML, CSS, JavaScript**

- Developed a static corporate website design using HTML, CSS, and JavaScript
- Structured content and layout to improve user engagement and information accessibility
- Improved website performance through optimization techniques such as asset compression and efficient styling
- Deployed the website and maintained performance stability across browsers

## Technical Skills

### Languages:

JavaScript, Java, SQL

### Frontend:

HTML, CSS, React.js, Tailwind CSS

### Backend & Databases:

Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

### Tools & Platforms:

Git, GitHub, Vercel, Render, Postman

## Achievements & Certifications

- Open Source Contributor — GirlScript Summer of Code (GSSoC) 2025, Elite Coders Winter of Code (ECWoC)
- Postman API Fundamentals Student Expert
- GenAI 101 Badge
- Participated in DIPEX 2025 Technical Exhibition
- be10x AI Tools Certification
